Real World Scenario

A TV show tracking and ranking database

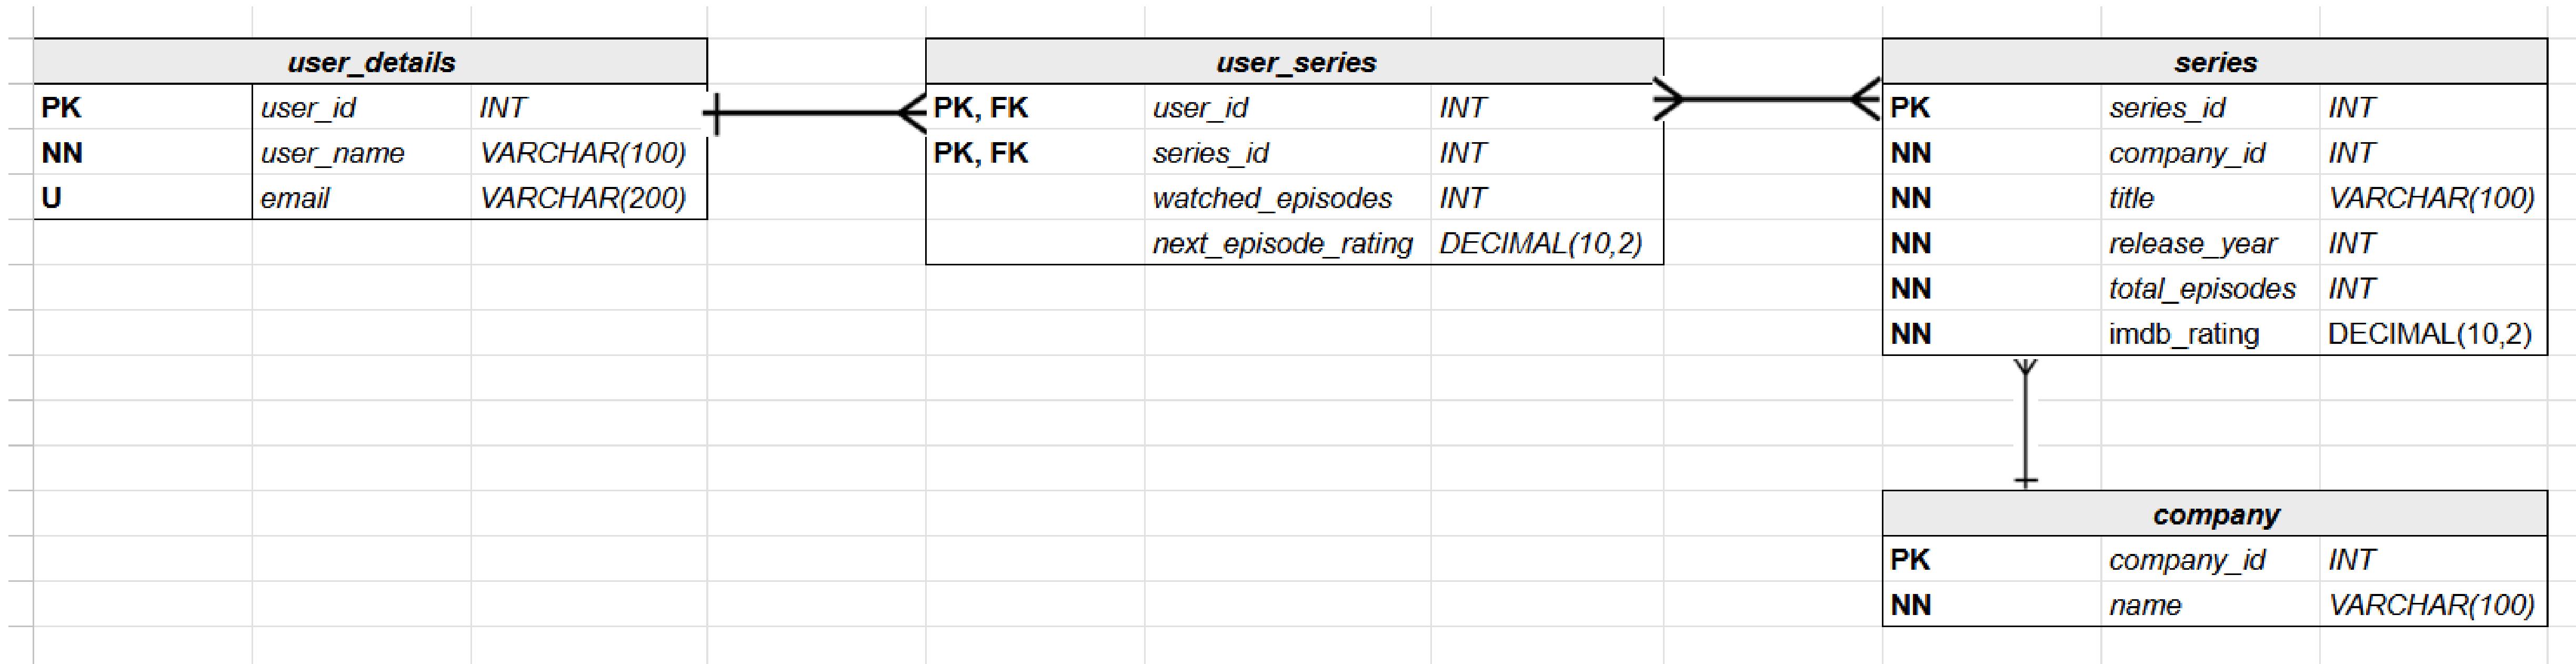

Users can log their progress for multiple series

Could be used by streaming platforms to monitor user engagement

Supports fan communities who want to compare show rankings and progress

Helps to track which shows are popular

ERD Relationship

user_details→*user_series*: one-to-many

series→*user_series*: many-to-many

company→*series*: one-to-many

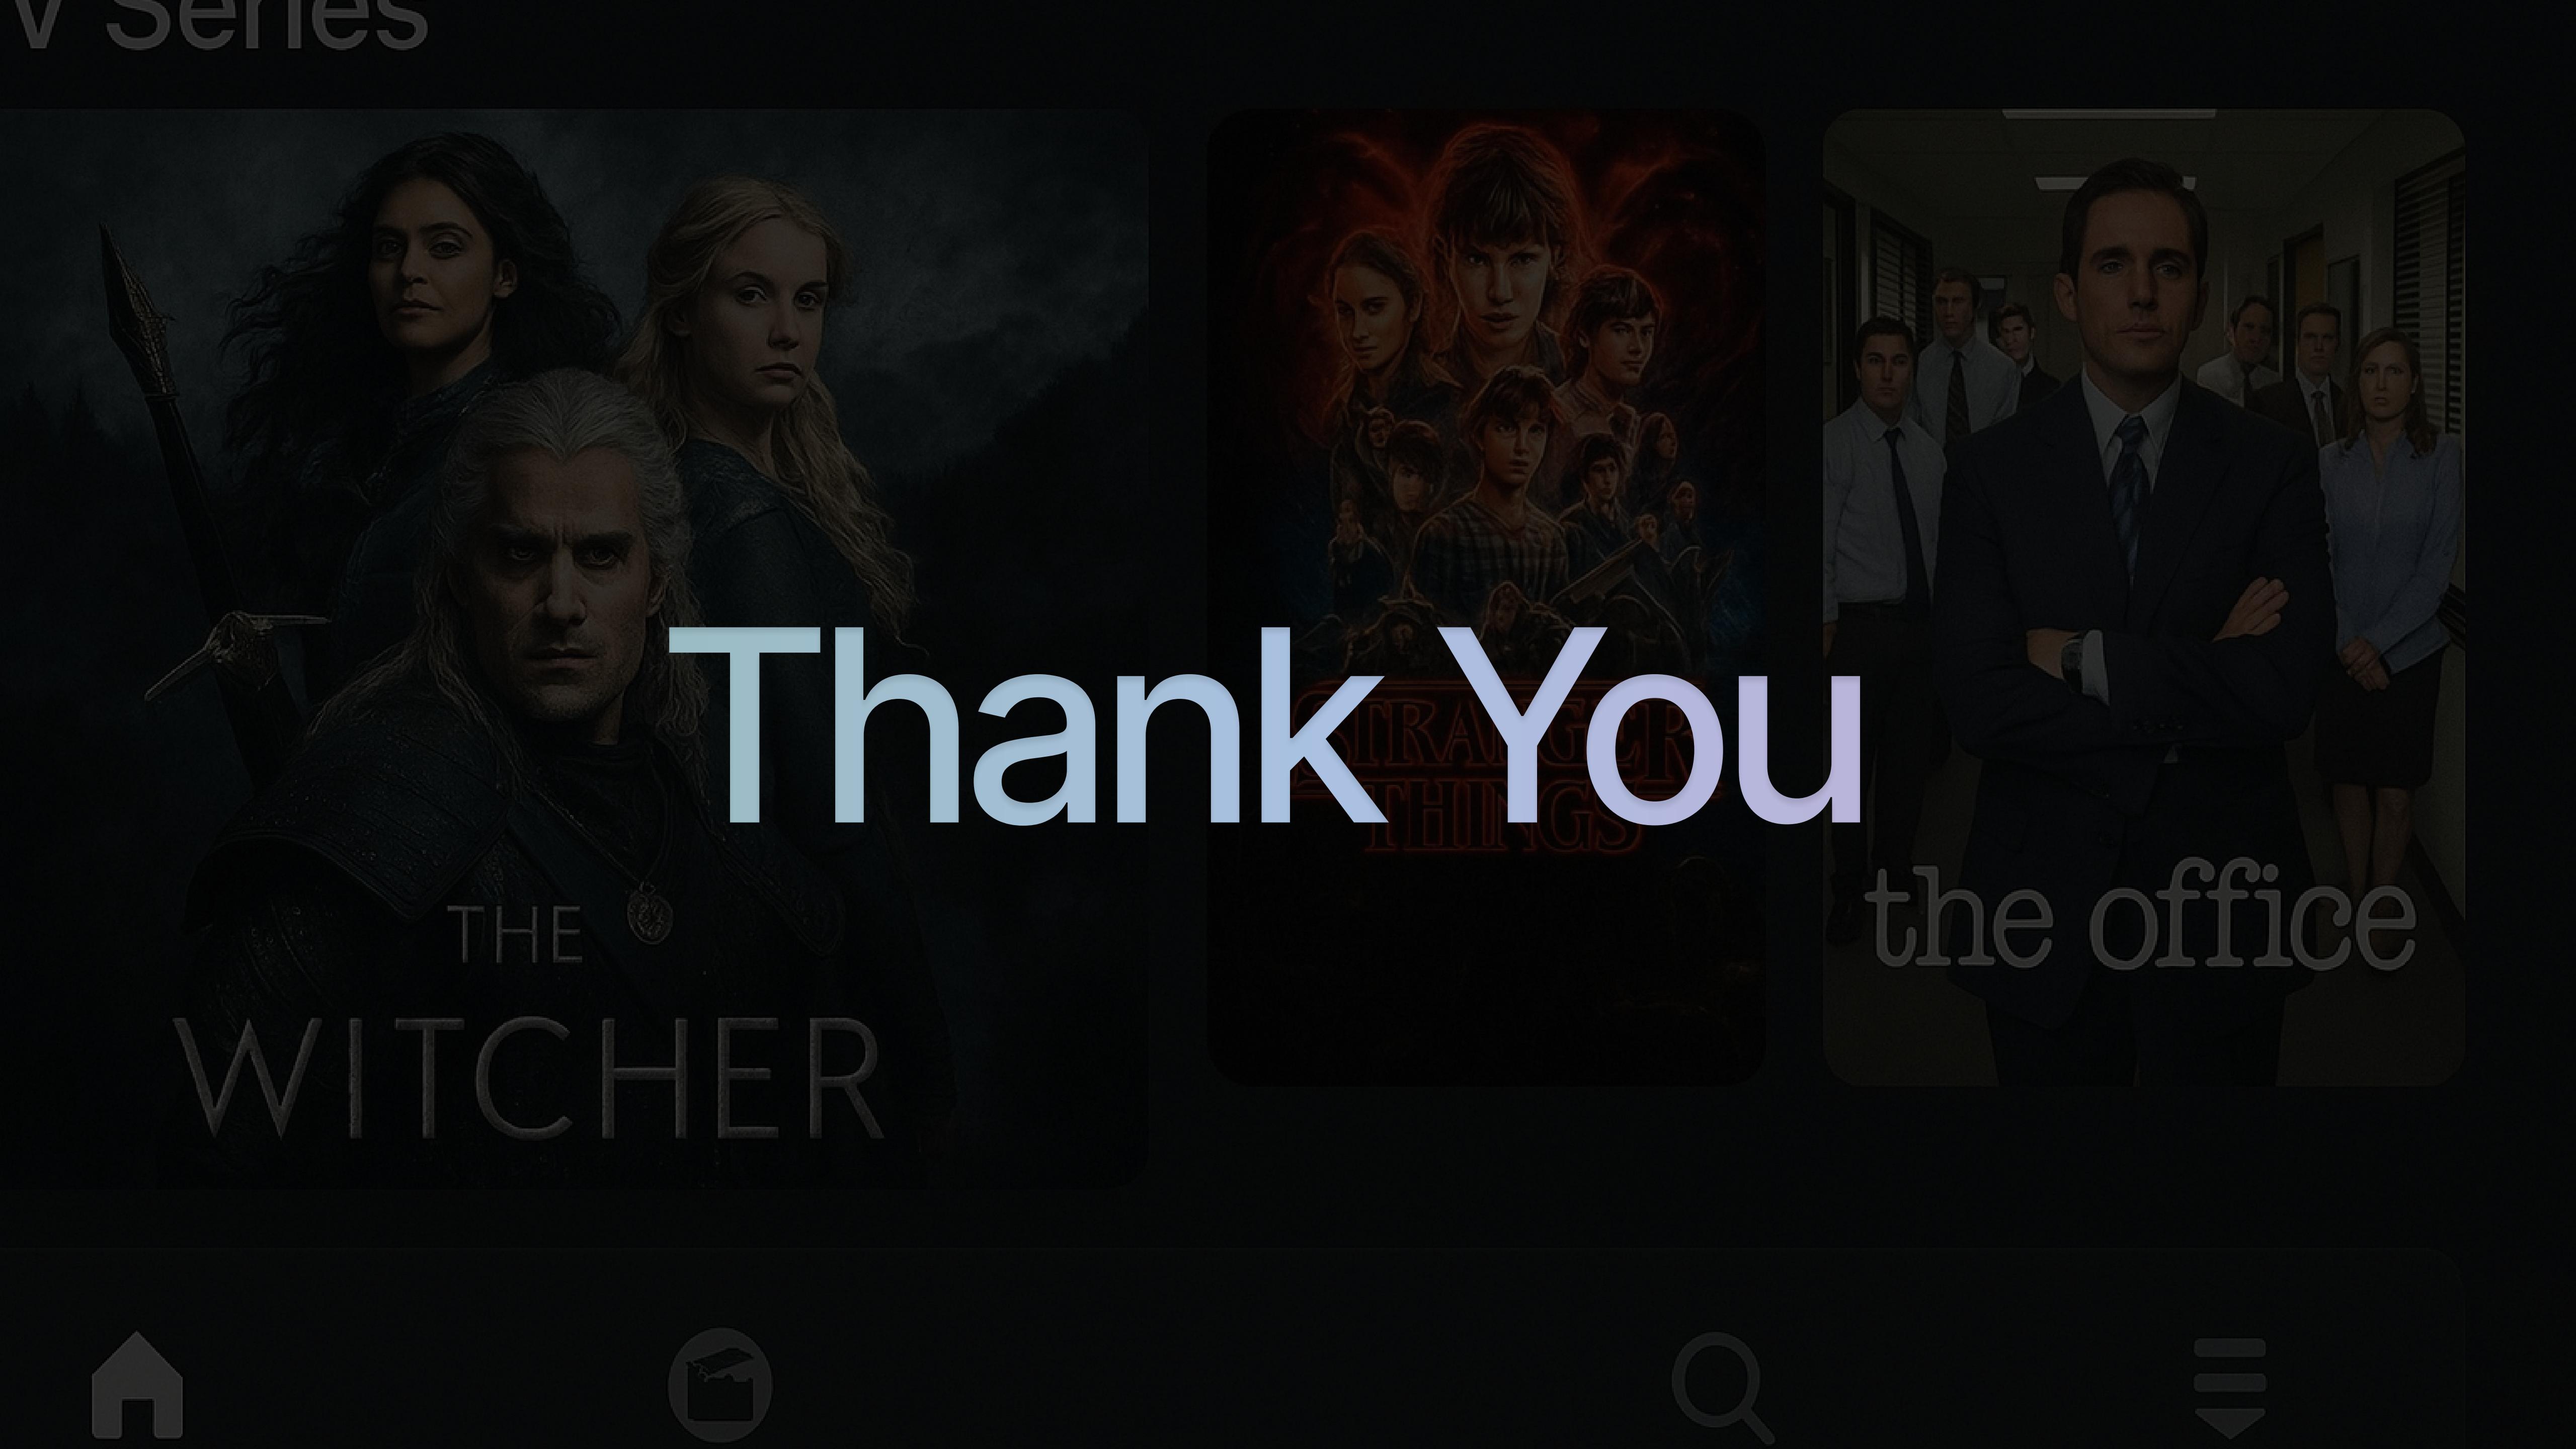

Problems this database solve

Prevents loss of track for how many episodes a user has watched

Eliminates inconsistent data

Combines multiple factors into a personalized ranking score for each series

Makes data-driven recommendations possible for users and companies

Thank You
